

AUXDATA...Newsletter #5

Welcome

Welcome to our fifth issue of the CG AUXDATA Newsletter dedicated to providing you with periodic updates on the new systems development cycle and links for all of you to view the "work in progress."

**NEW TERMS
AND
DEFINITIONS**

ACTIVITY LOGS. Is a Cube in our new AUXDATA system that captures all member activities. The majority of all data entry to the system will be performed here. Before entry to the Activity Logs page however, the member will be afforded the choice of resources, examples are Aircrafts, Boats, Radio and Units. After selecting the applicable resource the member can then proceed to the Activity Log screen where details of the activity can then be completed. The tabs at the top of the screen shots (below)

Activity Log Details, Crew Assignment, Tasks etc, will allow the member to capture the full scope of their activities before forwarding to the appropriate approval authority. Each data Entry field on the Activity Logs Page, except the Zulu offset, will feature a list of values to select from, giving a complete picture of our member's activities and contribution. The Zulu Offset will be derived from your geographic location

**When can I
start
reviewing
AUXDATA**

Expect Internet capability in late August 2001. In the interim you may access the new AUXDATA system by going to a location where the Coast Guard has a SWIII computer terminal and logging on using the following INTRANET URL

<http://auxdatadev.osc.uscg.mil>

User-name: auxtest

Password : test_aux

Comments maybe directed to ENS Williams at e-mail below:
DFWilliams@comdt.uscg.mil

**AUXDATA
Training at
NACON 2001**

Plan to attend one of our AUXDATA training sessions At NACON 2001. Training will be held on Aug 31 at 1330-1515 and on September 1 at 1315-1500. The training sessions will take the form of lectures, workshops and product demonstration. Technical Representatives from the Coast Guard's Operational System Command, Auxiliary and the Chief Directors office will be on hand to answer any questions participants may have. This is your opportunity to come see our new system at work and get the opportunity to be trained on using AUXDATA.
